Some Overall Comments regarding the training...

I like this format better than the classroom workshop. You go at your own pace and you can always rewind the video to get a better understanding or if you missed something.

Keep up the good work. I can take this training anywhere anytime. My home base is Mississauga, Ontario but I am filling out this survey in Calgary, Alberta.

I felt this was a great start to learning VBA and excited for more.

This is a very useful course and I am no longer intimidated by VBA code. This was a great foundation course and now when I google VBA code for something I like to accomplish at work, I have some understanding of what it means.
